### PHILOSOPHY:

My goal is to develop students who can critically analyze and interpret texts and demonstrate their knowledge through written responses and/or class discussions. I will share my love of reading and encourage students to explore multiple genres in order to become life-long learners. Learning extends beyond the classroom, and I value the importance of supporting literacy at home and having open communication.

### TIPS FOR SUPPORTING LITERACY AT HOME:

- Encourage your child to read at home, for information or pleasure, on a regular basis.
- Model reading for pleasure and information.
- Take turns reading aloud pages from a book.
- Encourage your child to get a library card, go to the library regularly, and check out books to read at home.
- Have your child share his/her school reading with you. Read the same book and have discussions at home.
